

Team JSHD - TA Meeting 10/21/2021

Suggestion to have meetings on a regular basis

- Being busy with other courses and lack of availability made us want to work asynchronously over discord, agreed to have more meetings
- Decided to have weekly meetings right after class on Monday evenings

Plan to have a retro/postmortem soon for assignment 1

- Did a good job on assignment 1
- Already assigned responsibilities for assignment 2
- **Todo:** Schedule retro/postmortem for assignment 1

Make progress on our assigned parts for assignment 2 the coming week and talk meet with our partner (Alex) the week after that

- Share progress
- Make sure that expectations are aligned
- Identify problems or required changes to the milestones
- Talk about our test/verification progress
- **Todo:** Schedule meeting with Alex to go over milestone progress

Decided to have api endpoint unit tests for assignment 2 not require connecting to the db

- Can use mock data in unit tests to avoid dependencies between milestones
- Full end to end testing will be done in assignment 3
